

PLASTIC PRODUCTS

MANUFACTURER

We are a manufacturer of customized plastic profile products. Our manufacturing facilities offer the flexibility to produce plastic extrusions in a variety of materials, shapes, sizes, and colors.

About Company

Established in 1978, we bring over three generations of hands-on experience in plastic manufacturing. What started as a small operation has grown into a full-scale facility with complete in-house capabilities.

We design and manufacture our own dies and moulds, which gives us full control over accuracy, development time, and consistency in production. From custom plastic extrusion profiles to injection moulded parts, every product is built to match your exact design or sample.

Our strength is simple. We don't rely on external dependencies. From concept to tooling to final production, everything is handled under one roof. This ensures faster turnaround, consistent quality, and reliable long-term supply. Today, we support multiple industries by delivering custom plastic solutions that match or outperform imported products, without the delays and uncertainty that come with overseas sourcing.

Who We Are!

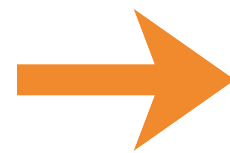

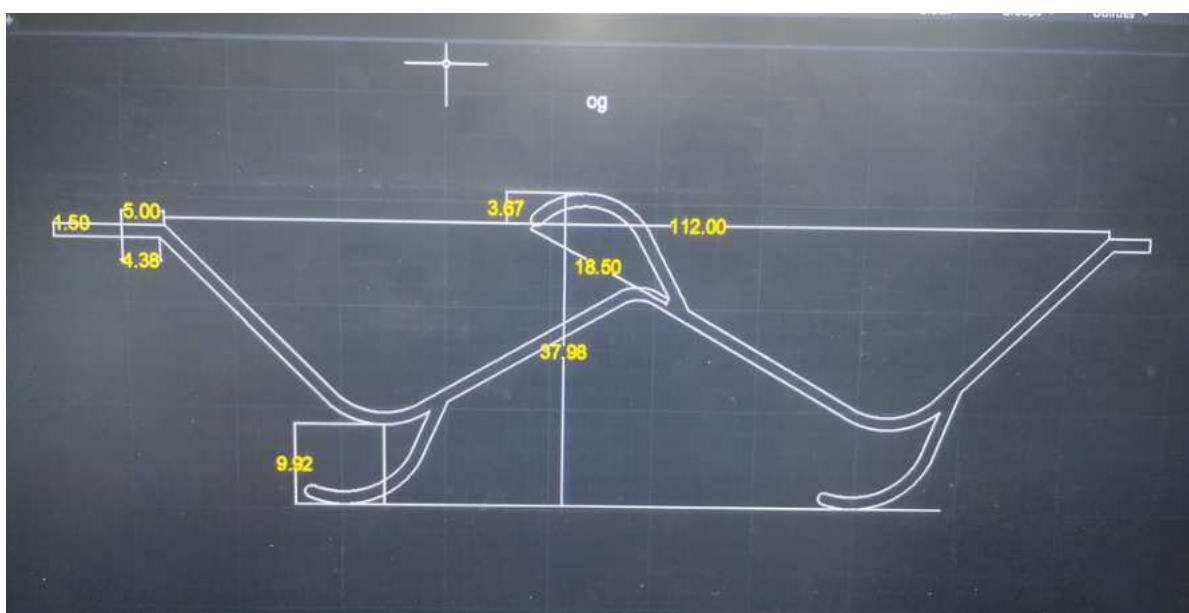

Custom Plastic Profiles Manufacturer in Pakistan

From design or sample to full-scale production with consistent quality

DESIGN

PRODUCTION

We manufacture **Custom Plastic Profiles** based on your CAD design, sample, or idea. Our focus is simple. Deliver the same or better quality than imported profiles while removing delays, restrictions, and dependency on overseas suppliers.

1. Exact Replication

From sample or CAD drawing

2. Mass Production Consistency

Same shape, same quality

3. No Import Delays

No shipping or clearance issues

4. Faster Turnaround

Local manufacturing advantage

5. Stable Supply

No dependency on overseas vendors

Our Capabilities!

What We Can Manufacture

From simple shapes to complex designs, we handle everything from development to production.

Custom Profiles | Injection Moulded Parts | Multi-Material Solutions

1. Custom Plastic Extrusion

PVC, ABS, HDPE, PP and more materials supported

2. Injection Molding

For detailed, high-precision plastic parts

3. Multi-Material Joining

Plastic combined with rubber, metal, and other materials

4. Precision Processing

Cutting, drilling, and adhesive application

5. Food-Grade Manufacturing

Safe materials for food-related applications

6. In-House Mold Design & Manufacturing

Custom molds designed and produced internally, ensuring faster turnaround and precise replication.

7. High-Volume Production Capability

Ability to handle both small batches and mass production while maintaining consistent quality.

8. Wide Range of Finishes & Textures

Options like matte, glossy, frosted, or colored finishes to match aesthetic or functional needs.

Why Companies Are Switching!

- Long & unpredictable lead times
- Shipping & customs delays
- High minimum order quantities
- Limited flexibility in design changes
- Communication gaps with overseas suppliers
- Local manufacturing with faster delivery
- Consistent quality with controlled production
- Flexible quantities based on your needs
- Easy communication & quick revisions
- Full control over design & material

Custom Profiles We Have Manufactured

Built As Per Industry Needs

Every profile is manufactured based on specific client requirements, not off-the-shelf designs.

Let's Build Your Next Profile

Start Your Project

Whether you have a CAD design, physical sample, or just an idea, we can turn it into a production-ready plastic profile with consistent quality.

- Share your requirement or sample
- Get quick feasibility and quotation
- Approve and start production

Replace imports with reliable local manufacturing.
